

First Time Easy Set-Up

After log in, set up the following five options for optimum performance.

1 Change Your Password:.....[#][7][1]

Required to Log In as a Subscriber. Password length can be from 1 to 8 digits. Default password is 0000.

2 Record Your Name:.....[#][7][2]

This recorded name plays to your callers when they are transferred through the Auto Attendant. The Automated Directory also plays your recorded name so callers get confirmation that they have selected their intended party. Note: By default you will not be included in the Dial By Name Directory if you do not record your name.

3 Enter Your Dial-By-Name Directory Name:.....[#][7][3]

You are asked to first enter (spell out) and accept your Last Name, then your First Name on the Telephone Keypad. The Automated Directory uses this feature for callers who know your name but do not know your extension number. Example for Jane Doe: Doe would be entered as [3] [6] [3] and Jane would be entered as [5] [2] [6] [3].

4 Record Your Primary (No-Answer) Greeting:.....[5][1]

This Personal Greeting plays to your callers when you do not answer your phone*. If you are only going to record one greeting, this is generally the one greeting you should record. If you do not record this greeting a system generated greeting will tell the caller you are not available and give them the option to leave you a message or dial another extension number.

5 Record Your Mailbox Greeting:.....[5][7]

This Greeting only plays when a Primary Greeting is not recorded and/or a call is transferred directly into your Mailbox. If the Primary No-Answer Greeting is recorded this greeting is optional as it will now only be heard if a caller is transferred directly to your Mailbox.

*There are other Personal Greetings available that can be scheduled to play for Busy, Forward All (DND), and Night Call Conditions. Ask your System Administrator for more information on Call Condition Greetings.

Quick Reference Index

AUTO PLAY OF MESSAGE INFORMATION[6][6]

Time & Date Stamp Information. This option can be turned on/off.

AUTO PLAY NEW MESSAGES[6][5]

Plays new messages after you log in. This option can be turned on/off.
